

Your Complete Turnkey Solution

Z-Ventilation Solutions provides complete turnkey, customized solutions for commercial kitchen ventilation systems in restaurants, hospitals, and institutional cafeterias. The combination of ZVS's design, engineering, and sales teams brings together a unique level of knowledge that allows them to provide comprehensive customized solutions for commercial kitchens.

Job Coordination

Z-Ventilation Solutions not only provides the complete design and drawings, our team attends BIM coordination meetings.

Turnkey Installation

Ask us about our national installation services from the site survey and pulling permits, all the way to final inspections. For more information visit z-vent.com

Ventilation Filtration

WoolGuard hood filters capture 98% of airborne grease while still allowing air to pass through to the hood.

Less Hood Cleanings | Easy to Install
Proven Results | Less Fire-Risk

Your Complete Turnkey Solution For Foodservice Consultants, Architects & Design Dealers

BRINGING TOGETHER THE BEST BRANDS FOR ALL COMPONENTS OF A HOOD

Hoods

Fans

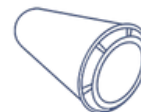

UDS

DOAS

Pollution Control

Ductwork

WHAT SETS US APART?

EXPERIENCE

With years of field experience, we are easy to do business with. The combination of our Design, Engineering, and Multi-line Sales teams brings a level of knowledge far beyond the hood system. By focusing on all aspects of a project, above and below the hood our team can consult and add value to any aspect of your project from the rooftop down, making your life easier. ZVS's team of "In House" Mechanical Engineers are certified in 49 states.

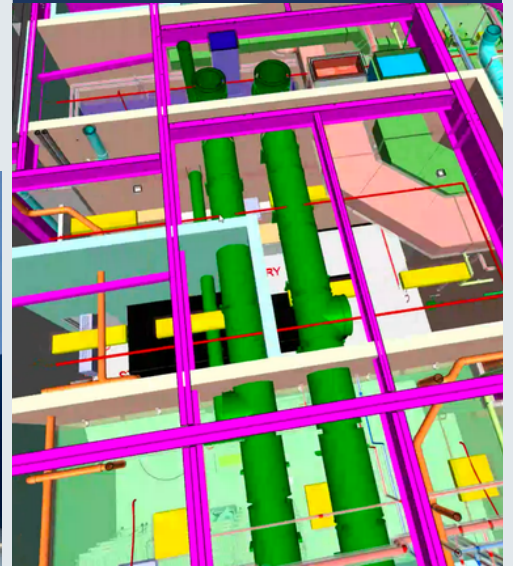

TURNKEY

ZVS Creates a seamless process from the inception of a project through its final completion. Our team provides a single point of contact coordinating all aspects of a project from site survey, design, quoting, engineering, CAD/ Revit drawings, permitting, BIM and construction meetings, and installation through final test and balancing. This turnkey approach is a transfer of your risk to our team of experts.

FLEXIBILITY

Design flexibility. We offer multiple types of hoods, ducts, fans, controls, PCU's, fire suppression systems, and filters. This portfolio of products allows us to design projects based on performance, not product restrictions.
