

#### UTILITY DISTRIBUTION SYSTEM

## UNRIVALED COOKING LINE VERSATILITY & CONVENIENCE

Z-Ventilation Solution's Utility Distribution System (UDS) provides one connection for utilities behind the kitchen hood. A two compartment raceway houses the plumbing and electrical connections needed for your specific application.

#### Custom Manufacturing

- Designed and built to match your exact kitchen specifications
- Many optional features available to meet your kitchen's needs
- Allows for any size electrical and plumbing load
- Versatility in unit configurations

#### Easy Operation

- All connections are controlled by one easy access panel
- Every connection is labeled by equipment and connection type
- Expedites kitchen start-up time as compared to a field-built wall

#### Quality Construction

- 16 gauge stainless steel outer shell, black iron gas manifold, copper plumbing manifolds, or high standard wire way
- Aesthetically pleasing
- Top of the line features
- Factory tested for proper operation

#### Advanced Safety Features

- Unit shuts off in the event of a fire
- Unit shuts off when electrical wiring in compartment is exposed
