

Z1000 Series Advantages

- ✓ Fail-safe actuation provides knowledge that any cooking fire will be suppressed without the risk of an electronic failure
- ✓ Multiple ventilation options provide the perfect solution for any application discharging needs
- ✓ Lighter hoods allow for ease of installation
- ✓ Variable speed controller allows the user to customize the fan speed
- ✓ Visual LED indicator provides ease of troubleshooting
- ✓ The ability to pressurize tanks in the field enables otherwise hazardous replacement and test tanks to be shipped overnight when replacements are needed to be back up and running
- ✓ Multiple voltage disconnect options are available to meet a variety of fuel source needs
- ✓ Proprietary fully integrated suppression system designed in-house eliminates potential hazards of a system that is retrofitted
- ✓ Wet chemical system provides an effective means of suppression while allowing for a quick and easy clean up
- ✓ Temperature switches provide stages of pre-suppression
- ✓ Carbon filter available on recirculating models to remove cooking odors
- ✓ Nozzle in the plenum of the hood helps protect the duct run
- ✓ Fixed nozzle positioning provides pretested nozzle location
- ✓ Toggle switch handicap accessible controls provides a simple to use solution
- ✓ Mechanical pull station prevents electronic failures
- ✓ 3-year product warranty with an extended warranty available provides unparalleled product support
